

Fluency:

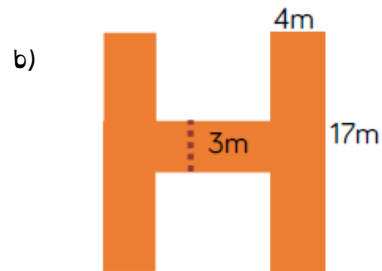

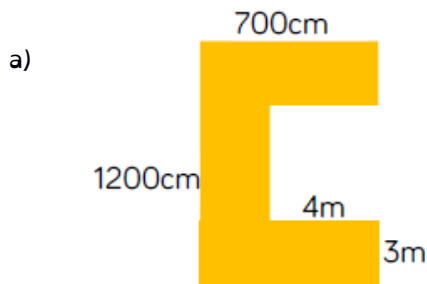

- 1) Find the area of the compound shape.
How many ways can we split the compound shape?
Is there more than one way?

- 2) Find the area of the following shapes. Calculate in your book.

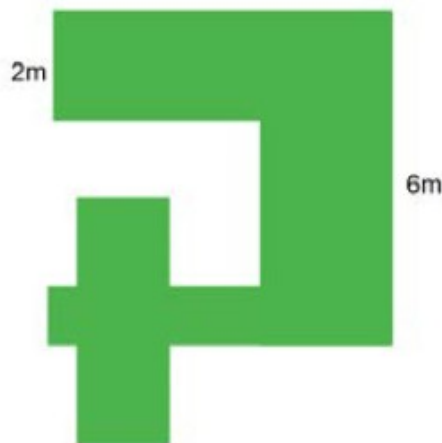

- 3) Find the area of the following shapes. Calculate in your book.

Reasoning

- 4) Investigate how many different ways you can split the following shape to find its area. Add plausible/sensible measurements and find

the area.

Diving Deeper:

- 5) Jack has a shape with an area of 36 cm^2 . Find 3 different possible compound shapes with the same area.
