I can recognise and explain inverse relationships.

Tick the number sentences that show inverses and cross the ones that don't.

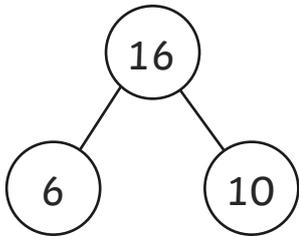

$25 + 7 = 32$

$19 - 6 = 13$

$32 - 7 = 25$

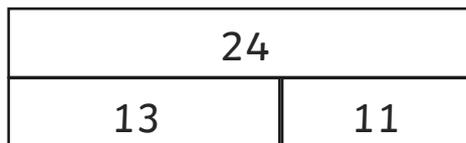

$19 + 6 = 25$

Fill in the missing gaps below to create inverse number sentences. Can you get back to where you started? Use the models to help you.

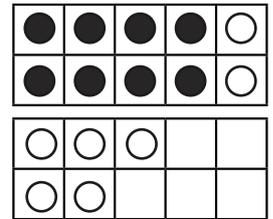

$16 - \underline{\quad} = \underline{\quad}$

$\underline{\quad} + \underline{\quad} = 16$

$\underline{\quad} + \underline{\quad} = 24$

$24 - \underline{\quad} = \underline{\quad}$

$\underline{\quad} - \underline{\quad} = \underline{\quad}$

$\underline{\quad} + \underline{\quad} = \underline{\quad}$

Can you write inverse number sentences using the numbers 22, 14 and 8? Draw or make as many models as you can to match.

Use equipment to explain the inverse relationship between addition and subtraction to a friend.
