Measuring Rainfall

Harry was using a rain gauge to measure the rainfall over the weekend.

On Saturday his rain gauge collected $2\frac{1}{2}$ cups, and on Sunday it collected $1\frac{3}{4}$ cups.

Can you work out how much rain fell altogether over the weekend?

The next weekend, his rain gauge collected $1\frac{1}{2}$ cups on Saturday and $2\frac{1}{4}$ cups on Sunday. Can you work out which weekend was the wettest?
